Before You Purchase

- ~ Register for TetraCare, our free online support system
- ~ Purchase the largest aquarium you can.
- ~ Place it on a sturdy stand.
- ~ Locate your new aquarium away from direct sunlight to discourage algae growth in the water.

The Water

- ~ Seek your dealer's advice about the quality of your local tap water. Knowing parameters such as pH and hardness will help you select fish that are well suited to live in the water in your aquarium.
- ~ Also ask your dealer if the water in your area contains chlorine or chloramine--strong chemicals used for water treatment in many municipalities. Always add AquaSafe to any water before putting it in your aquarium. AquaSafe neutralizes or eliminates chlorine, chloramine and heavy metals.
